

InterPore2018 New Orleans

Tuesday 15 May 2018

Parallel 3-G (09:30-10:44)

time	[id] title	presenter
09:32	[741] Novel finite-volume methods for anisotropic linear elasticity and poromechanics problems with full tensors	Prof. TCHELEPI, Hamdi
09:50	[556] Higher order multipoint flux mixed finite element methods on quadrilaterals and hexahedra	YOTOV, Ivan
10:08	[544] Modeling of Additional Oil Recovery Processes by Low Salinity Water Injection using the Open Source Software Platform DUNE-DUMUX	Dr DIAZ-VIERA, Martin A.
10:26	[409] Multiresolution Coupled Compositional Vertical Equilibrium Model for Fast Flexible Simulation of CO2 Storage	Dr MØYNER, Olav
