

# InterPore2018 New Orleans

## Thursday 17 May 2018

### Parallel 10-C (10:45-12:15)

| time  | [id] title  | presenter           |
|-------|---|---------------------|
| 10:47 | [920] Network Connectivity in Complex, Three-Dimensional Fracture Networks  | REEVES, Donald M    |
| 11:05 | [441] Coupling of different numerical approaches for efficient simulations in porous and fractured media                  | Dr SCIALÒ, Stefano  |
| 11:23 | [515] Applications of standard and mixed Virtual Elements to the simulation of physical phenomena in poro-fractured media | BORIO, Andrea       |
| 11:41 | [143] A parallel boundary element method for subsurface flow problems in three-dimensional fracture networks              | Dr FENG, Yin        |
| 11:59 | [134] Near Fracture Capillary End Effect on Shale Gas and Water Production  | Mr ELPUTRANTO, Riza |
| 12:02 | [233] A Meshfree Approach to Modeling Hydraulic Fracturing in Saturated Porous Media                                      | WEI, Haoyan         |
| 12:05 | Empty pitch slot  |                     |
| 12:08 | Empty pitch slot  |                     |
| 12:11 | Empty pitch slot  |                     |
