

Session Program

May 30, 2022 to June 2, 2022

InterPore2022

MS12

Tue, May 31

4:30 PM

MS12: Parallel Oral Session 6F

Session

4:45 - 5:00 PM **NMR characterization of critical boundary of pore fluid in shale**

Speaker

Dr Xu Dong

5:00 - 5:15 PM

Study on the distribution characteristics of in-situ stress of Chang 7 reservoir in Ordos Basin

Speaker

Ms Kou xiaoxuan

5:15 - 5:30 PM

Multimodal geo-dynamic flow characterization in heterogeneous carbonate reservoir: An integrated approach linking static and dynamic behavior

Speaker

Mr Jiaheng Chen

5:30 - 5:45 PM

A probabilistic approach dedicated to the prediction of the reactive mass transport in porous media

Speaker

Dr Thomas SAYET

5:45 - 6:00 PM

The yield surface of reservoir chalk from the North Sea: influence of age, mineralogy and water saturation.

Speaker

Frédéric Amour

6:00 PM

Wed, June 1

2:05 PM

MS12: Parallel Oral Session 8F

Session

2:05 - 2:20 PM

Study on Microscopic Imbibition process in Variable Diameter Capillary Tubes

Speaker

Dr Lihua Shi

2:20 - 2:35 PM

Experimental Research of Spontaneous Water Imbibition in Oil-Saturated Reservoirs with Ultra-low Permeability

Speaker

Prof. Hailong Dang

2:35 - 2:50 PM

A macro-scale elasto-thermo-viscoplastic constitutive model for saturated frozen soils

Speaker

Mr Dana Amini

2:50 PM
