MS16: 4.3 (13:50 - 15:05)

time	[id] title	presenter
13:50	[885] Membrane fouling and filtercake formation during static microfiltration harvesting of microalgae using thin glass fibre filters	Mr WU, Jincheng
14:05	[705] Color Properties and Porous Ink Layer – a study via Optical Spectroscopy	Dr TOMOZEIU, Nicolae
14:20	[748] Evaporation and absorption of surfactant-laden droplets on unsaturated porous media	LI, Xiaoxing
14:35	[278] Unveiling moisture transport mechanisms (vapor vs. bound water) in cellulosic materials: application to droplet absorption	ZOU, Yuliang
14:50	[986] The effect of graphene and porous coatings on flow boiling in flat microchannels under intense localized heating	Dr ZAITSEV, Dmitry
